

SE500

SE500 is sophisticated, compact design and high performance model for surface roughness, waviness and steps. Compatible with various parameters and perform simultaneous analysis of multiple Standards. Excellent expandable unit to meet all applications.

- ▣ Longest driving range and straightness in portable class
- ▣ Combining a touch panel with a switch operation
- ▣ Larger margin of recording paper
- ▣ Enabling combinations compatible with various applications

Standards	JIS(2001/94/82), DIN, ISO, ASME
Measuring range	Z: 800 μ m X: 55 mm
Minimum resolution	0.08 nm
Measuring magnification	Z: 50-200,000 or Auto X: 1-1000 or Auto
Measuring speed	0.05-2 mm/s
Combinations	7 models from portable type to stationary type
